# TERRELL'S AQUATIC NURSERIES

Best Wild Duck Foods For Fall Planting

Choice Wild Rice For Table Use

OSHKOSH, WIS., U. S. A.

Fellow Sportsman:-

There's a big hatch of ducks, geese,  
coots and other waterfowl this year. Motion  
pictures we've seen taken on the breeding grounds,  
show ducks and geese thicker than we ever dreamed of.

Would you like to have these birds stop with you through  
the season, instead of just stopping for a rest and then going  
on their way? Ducks must eat, and do eat about 1/4 pound of  
food per day each. It's necessary if you want them to stay,  
that you provide them with enough attractive food to eat  
throughout the season.

Fall is Nature's seed-sowing time and the proper time  
for planting Wild Rice and Wild Celery seed and other duck  
foods named herein.

For three generations the Terrell family has been growing  
duck foods. We have learned a lot about how to grow  
foods that we are glad to pass on to you. Terrell's seeds  
are well-ripened, mature and full of life, handled just  
right and will give you the utmost in growth of duck food for  
each dollar you invest in seed.

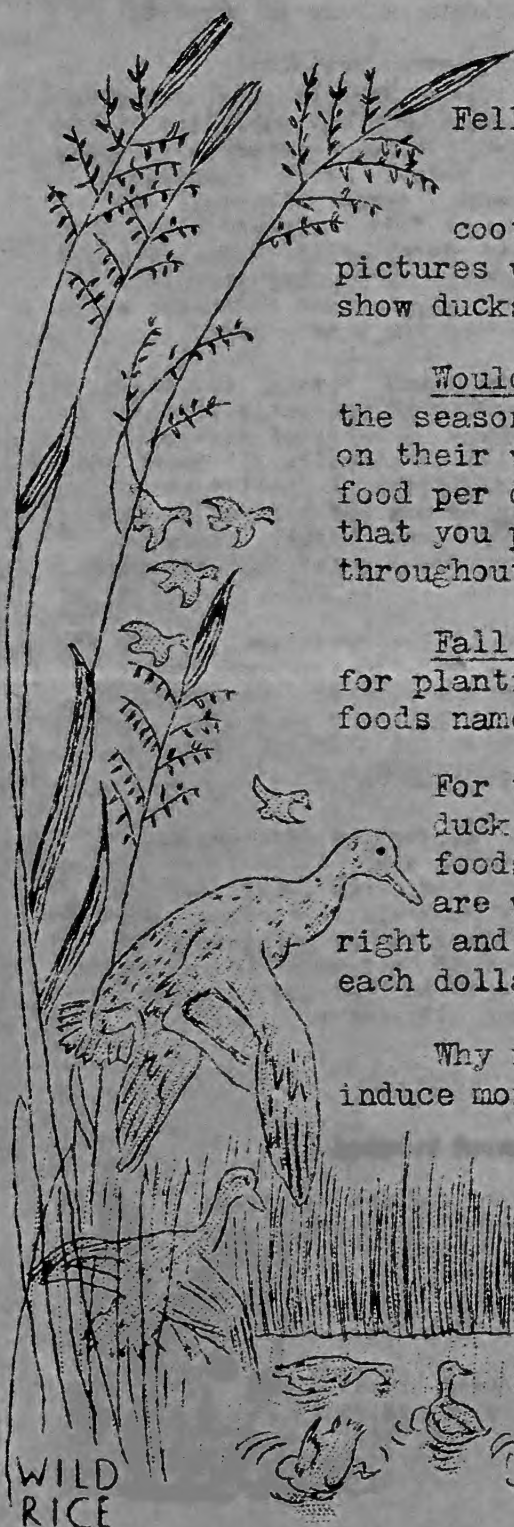

Why not send an order for seed for fall planting and  
induce more of the flight of waterfowl to stay with you?

Yours for More Ducks,

*Clyde B. Terrell*

For Fins, Furs, Feathers and Folks

P.S. See next page for details and prices.

## Duck Foods For Late Fall Planting

Natural Food will attract and hold more Wild Ducks and other wildlife. This is Nature's sowing time.

For quick results, scatter Star Duck's Meat and Coontail plants now. They start growing and feeding ducks as soon as planted. Star Duck's Meat and Water Cress stay green and furnish food the year around.

Coontail, Elodea and Horned Pond Plant may be established at any season, when waters are not frozen. Seeds such as those of Wild Rice, Bushy Pond Plant and Muskgrass are available and in the best condition for planting now. Order your supply today!

Detailed planting directions furnished.

### Giant WILD RICE Seed

Bu. \$24.00

Pk. \$7.50

2 qts. \$2.50 (Postage 25¢)

2 bu. of Terrell's seed sows 1 Acre.

TERRELL'S GIANT WILD RICE SEED  
MAKES MUCH MORE DUCK FOOD PER ACRE

ORDINARY WILD RICE SEED

WILD RICE is excellent duck food and cover for Mallards and all marsh ducks, and geese. Get Terrell's big seed, it makes more food. Scatter seed where water is not wave-swept, less than 3 ft. deep, fairly free of dense growth. No mud balling or bother if you use Terrell's seed which sinks readily. Usually best to plant in rivers or lakes, ponds or marshes with outlet, or at an inlet where fresh water comes in.

WILD RICE must be kept damp and cool - if heated or dried its growing power is damaged. Make certain of sure-growing seed by ordering Terrell's - it is properly handled, well-ripened and recleaned of stalks, leaves and other trash. Plant N. of Savannah, St. Louis, San Francisco.

### SMARTWEED (*Polygonum pennsylvanicum*)

Annual Duck and Upland Bird Food. Sow on moist shores and banks above water. SEED 40 Lb. (Sows 1 A.) \$10; 3 Lb. \$1; 100 Lb. \$19.

## Provide Duck Food This Season With Star Duck's Meat and Coontail

These Quick-growing Plants make good food for Ducks and Muskrats as soon as planted.

### STAR DUCK'S MEAT (*Lemna trisulca*)

PLANTS: Bu. \$3. Grows from Missouri and Ohio northward. Praised highly for duck food by the Ontario Government. Thrives either in slightly acid or hard fresh water. Grows in somewhat alkali water in West. Ponds, flowages, and waters with rushes or fallen timber afford good anchorage to these plants which float submerged and unrooted. Scatter 12 bu. per Acre in 2 to 3 ft. quiet water. Stays green and makes Wild Duck and Muskrat food the year around.

COONTAIL (*Ceratophyllum*) PLANTS, Bu. \$4.00. 5 Bu. \$17.50. Scatter 12 bu. per A. in 2 to 5 ft. quiet water where it will not wash out. COONTAIL is eaten by practically all Ducks and by Swans. Most productive of small forms of life for Fish Food of any water plant we know. Has no roots, floats under water. Grows in either acid or hard fresh water. Stands shade.

### ELODEA (*Anacharis*) Carp-resistant.

PLANTS: Bu. \$4; 10 Bu. (Sows 1 Acre) \$30. Quick-growing food for Redheads, Mallards, Widgeon, Scaups, Teal. Endorsed by "Ducks Unlimited." Grows in hard, clear, fresh water. Thrives in streams even if quite cold.

### TRUE WATER CRESS (*Nasturtium officinale*)

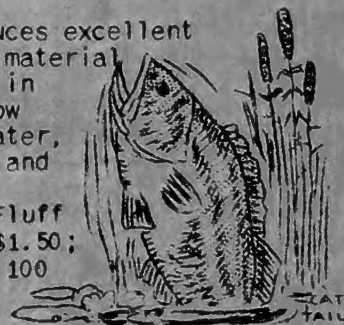

PLANTS: Bu. \$5; 5 Bu. \$19. Delicious in salads and sandwiches. Just as good for Ducks and Muskrats as for you. Rich in vitamins which promote the breeding instinct. Plant in few inches of hard water in springs, streams or flowing wells that don't freeze in winter. Makes food all winter.

### CAT-TAIL (*Typha*)

#### Excellent For Muskrat Marshes

A Cat-tail marsh produces excellent food, and house-building material as well. Cat-tails grow in marshy places, and shallow fresh, or rather salty water, almost anywhere in U. S. and Canada.

PURE CAT-TAIL SEED: Fluff removed. SPECIAL 2 LB. \$1.50; 10 LB. (Sows 1 Acre) \$5; 100 lbs. \$40.

**MUSKGRASS For Clear, Hard,  
Marl, Brackish or Alkali Water.**

5th Best Duck Food based on government report of amount eaten by ducks. Grows submerged a few inches high on bottom of lakes and streams, where it makes natural fish hatcheries without interfering with fishing. Grows in water salty to taste as well as fresh water.

PLANTS WITH RIPE SEED SPORES: Bu. \$4.  
Scatter 5 Bu. per acre in 2 to 5 ft. water.

**BUSHY POND PLANT or NAIAD (*N. flexilis*)**

2nd best Duck Food in Minnesota (Wild Rice rated the best) according to duck stomach investigations by Marius Morse, University of Minnesota.

Excellent cover and food producer for fish. Grows submerged about 6 inches high—in 1 to 5 ft. fairly clear, fresh, slightly salt, somewhat alkali, hard or slightly soft water—on sandy or mucky soil. Seed available only in Fall. Sow 5 bu. per A. PLANTS WITH RIPE SEED: Bu. \$5.

**WAMPEE or DUCK CORN (*Peltandra*)**

Seeds as large as corn—good Duck Food. Does well on muddy, marshy places and up to 1 ft. water, from Indiana eastward to Atlantic in neutral or acid water; also on fresh tidal waters near coast. Sow 10 lbs. per A.

SEED: Lb. \$1 (Prepaid \$1.25), 10 Lbs. \$9.

**WILD DUCK MILLET (*Echinochloa*)**

Important Duck Food to sow in the citrus fruit country of South, during Fall and Winter. Broadcast 20 lbs. Seed per Acre on moist bare shores and mud flats. Wild Ducks and Upland Game love the sprouting plants and later feed on the seed. Called the "Wild Rice of the South."

SEED: 20 Lbs. \$4; 100 Lbs. \$16; 4 Lbs. \$1.

**OTHER FOODS FOR WILDLIFE**  
Ask For Them. See Spring Folder!

Herein you will find the kinds available and which we believe are best for Late Fall Planting. Some Spring Planting Materials, such as Roots and Tubers, can be furnished for planting now to those who desire.

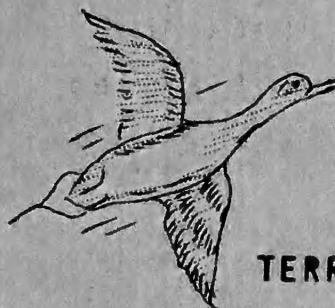

**Fancy Wild Rice For Table Use —**

**Want Some To Eat?**

"You can't beat the combination of Wild Rice and Wild Game," writes a customer. Wild Rice for Eating is scarce this year. Cost us 2 to 3 times more than last year. Limited supply carefully selected for fine flavor for our customers at

per pound f.o.b. Oshkosh.

A pound serves 15 people. Recipes included.

## WE WANT TERRELL'S NATURAL DUCK FOODS!

WISCONSIN: "We have a wonderful stand of your Wild Rice. We are well pleased with your work and hope to continue our program with you." O. L. WEBER, Weber Lifelike Fly Co., Portage County.

"Your Wild Celery is doing very nicely." V. E. GANTENBEIN, Pierce Co.

MINNESOTA: We purchased Wild Rice from you for planting along the Mississippi River. It has done extremely well. We are very much pleased with the results and believe they will be reflected in better duck shooting this fall."

DR. ALBERT M. SNELL, Olmstead County.

MICHIGAN: "We have many acres of Wild Rice from the seed we purchased from you. We had more ducks here than any time in the last 10 years."

E. C. UNDERWOOD, Luce County

ONTARIO-- QUEBEC: "Wild Rice has taken in practically every part of the Bay. The Bay is full of Wild Celery -- We only put in 5,000 tubers of this this spring."

SHIRLEY E. WOODS, Woods Mfg. Co. Ltd.

CHICAGO: "The Wild Rice for Table Use which I purchased here is not as good as that which you sent me - Would like your folder suggesting ways of preparing Wild Rice."

Anne Pawmen, IZAAK WALTON LEAGUE HEADQUARTERS.

WIS. CONSERVATION DEPT.: "We feel that there is no one in this country as well qualified as you are to carry on the work of aquatic biology."

Wm. F. GRIMMER, Supt. Game Management.
